<p>As worst bets and strategies in American Roulette: Don't let the Ca

sino have the advantage!</p> <p>When it comes to casino games, 🧲 roulette is one of the most p

opular and exciting games. with a rich history that goes back</p> <p>to the 18th century. 🧲 Nonetheless, every game in the casino h

as a pre-determined house edge that makes the house, and not the</p> <p>player, the winner, 🧲 most of the time.</p> <p>However, not all bets and strategies are equally advantageous for the p

layer. In this sense, American Roulette, 🧲 which</p> <p>has both the zero (O) and double zero (OO) slots, has a higher house ed

specially those marked as worst bets.<</p> <p>Worst bets in 🧲 roulette and the house edge</p> <p>Basket bet or five-number bet (0, 00, 1, 2, and 3) is a typical example

of 🧲 the worst bet in American Roulette. You cover fewer</p> <p>numbers than straight bet (single number), yet you have a 7.9% house &#

129522; edge 3.65 times more than the overall houseedge. Why?</p> <p>lt happens because the double zero slot (00) dramatically increases the

🧲 odds in favor of the house, going from 1 in 38 or</p> <p>1 out of 37 (0) chances (European Roulette) to 🧲 1 in 39 oppor

tunities for either zero or double-zero.</p>

<p>Thus, playing American Roulette is not encouraged if you wish to decrea

se 🧲 the house's advantage while some other bets in roulette</p&

gt;

<p>should also be ignored, even in so-called favorable versions (e.g. Euro) Tj T* BT /F1
